HYDRATES INHIBITOR

Alcohol mixture designed to control the formation of gas hydrates in gas production and transportation facilities.

Gas hydrates are generated due to the presence of water and condensate in the gas lines, at low temperatures and high pressures, causing them to clog. Such obstructions can cause pipe ruptures and consequently lost production.

APPLICATIONS

The product prevents the formation of hydrate plugs and blockages of gas lines. Avoid breakage of production and transport lines.

SPECIFICATIONS

Analysis	Specifications	Methods
Appearance / Colour	Liquid / Colorless	Visual
Alcohols (wt %)	> 99.5	IMPCA 001
Density at 15 °C (g/ml)	0.790-0.800	ASTM D4052
Vapor Pressure at 37.8 °C (psi)	< 1.5	ASTM D5191

October 2020 REV.: 03
